

A

A. Double-Handle Coin Tote **New!**

- Specifically designed for shipment of loose coin
- Revolutionary non-skid plastic keeps stacked bags neat and orderly
- Holds up to 55 pound weight capacity
- Top-loading design eases bag mounting to coin sorters

Tote has become the preferred choice for most leading armored carriers, financial institutions, national vending companies, retailers and casinos. Coin Totes meet, if not exceed, the standards of the Coin Processing Industry, Federal Reserve and OSHA. Clear, 3-ply bags are constructed of high-strength 6.5 mil. film and durable side seams. Pressure-sensitive, self-sealing closure features a strong permanent adhesive. Unique film overlap at closure provides a reinforced seal and eliminates coin exposure to adhesive. Two 3-1/2" wide reinforced handles make carrying heavy coin easier and safer. Top-loading design makes it easy to seal coin-filled bags. Alphanumeric barcoding on tear-off receipt and bag provide internal routing and tracking. Bag air vents release trapped air and minimize condensation. The interior space measures 12-1/2"W x 16"H. Packed 100 per box.

Model No.	Description	Outer Dimensions		
		W	H	Thickness
2310421DBL20	Double-Handle Coin Tote	12-1/2"	23-1/2"	6.50 Mil

C. Coin Tote Shipping Labels

- Color-coded and imprinted labels provide at-a-glance identification of coin totes during transport
- Ideal for banks, currency exchanges, casinos, arcades, laundromats, schools, government agencies, or any cash business

Labels are printed on high-quality bond paper with adhesive backing to stay where they are placed. Each label is printed with coin denomination and total dollar value and is color coded to conform to Federal Reserve/ABA standards for coin denominations: pennies (red), nickels (blue), dimes (green), quarters (orange), halves (sand), and dollars (gray). Large 3"W x 2"H label size has a blank area large enough to accommodate a self-address stamp or hand written notes. Designed to adhere to the top left corner of Self-Sealing Coin Totes (231042120) eliminating the need for separate bag tags and security seals. Come 100 labels per roll.

B

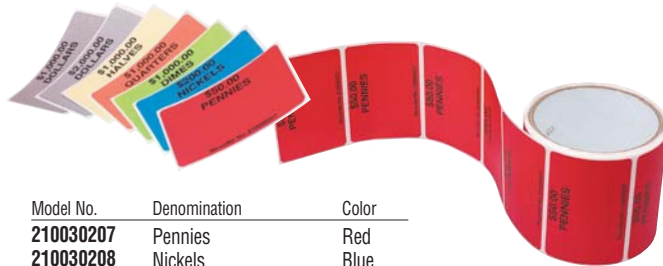

B. Self-Sealing Coin Tote

- Textured film surface reduces slippage when bags are stacked
- More economical than cloth bags for coin deposits; eliminates the need for daily deposit bag returns

Made of durable, 6.50 mil polyethylene film that is water and tear-resistant. Designed for use with most popular coin-counting machines, bags feature a tamper-evident adhesive seal that is permanent and simple to use. Strong heat-sealed seams hold up to rough treatment and prevent tote from splitting at the seams even carrying up to 50 lbs. of coins. Built-in reinforced handle makes transporting safe and enables handlers to carry multiple bags at once. Each bag has its own unique alpha-numeric numbering, bar code, and tear-off receipt strip to create a permanent audit trail making deposits easy to trace. Imprinted white-shaded areas allow you to enter information such as destination, sender, preparer, date, and denomination directly on the bag for easy identification. Tote holds standard Federal Reserve Bank capacities and when used with ABA color-coded shipping labels (sold separately) meets Federal Reserve standards for depositing coins. Packed 100 per box.

Model No.	Description	Outer Dimensions		
		W	H	Thickness
