

## Fire-Block® Bags Provide Superior Fire-Resistance and Strength!

In an independent laboratory test, a Fire-Block Satchel was engulfed in 1600° F flames for 15 minutes. 100% of the contents survived! Stacks of checks were placed in a clear vinyl bag inside the satchel. All checks were slightly charred on the edges, but remained completely legible. Actual fires may produce varying results.

### Multi-Layer Construction

- 2-ply Cordura® Plus Fabric

Twice as durable as ordinary nylon, and 14 times more durable than cotton. The Cordura shell is made from 1000 denier nylon with a polyvinyl laminate. It's exceptionally resistant to punctures and tears. Moisture-proof laminate prevents paper contents, especially checks, from curling at the edges and jamming sorting equipment.

- 2-ply Fire-Barrier Fabric

Withstands a constant temperature of 1800° F, with a melting point of 3000° F. This fabric makes the bag fire-resistant! The thermal barrier consists of 18-oz. silica fabric and aluminized polyester, which reflects high levels of radiant energy. It also provides strength and abrasion resistance.

- 1-ply Cotton Twill Laminate

Adds sturdiness and protects contents from moisture. The 6-oz. layer of cotton conceals the Fire-Barrier fabric, and adds to the thickness of the bag. It also provides moisture protection to paper contents.

## Fire-Block® Bags

- Don't take a chance of losing your currency or one-of-a-kind documents in a blaze
- Ideal for armored car & courier services, banks, check cashing services, credit unions, currency exchanges, retailers, casinos, and all financial institutions

All Fire-Block® bags (except Courier) are secured with a lock that features a 7-pin tumbler making it virtually pick-proof providing maximum security to bag contents. UltimaShield™ metal guard and vinyl-reinforced corners protect lock and help prevent wrongful entry. Reinforced stitched handles comfortably support heavy weight and large capacities. Framed acrylic I.D. window is ideal for business card or address card (included). Price includes silk screen imprint (one color/one location). Color choices listed below. Includes two keys (lock is keyed differently).

### A. Fire-Block® Totes

Made of laminated Cordura®Plus fabric with a moisture-proof coating to prevent paper contents from curling. Rigid construction and square-bottom design simplify loading. Features flap with hook & loop fastener to shield both the lock and pick-resistant zipper from heat.

Model No.	Dimensions			Color

Embroidery available at additional charge (add Model No. 2339007. For options see page 71).

### B. Fire-Block® Rugged Totes

- MMF's most rugged Fire-Block® tote!

Outer shell is durable 18 oz. Duck fabric, a rugged 2-ply water-repellent cotton canvas that is the heaviest fabric available and is extremely puncture and wear-resistant. Features flap with hook & loop fastener to shield both the lock and pick-resistant zipper from heat. Heavy-weight vinyl skirt increases longevity, and 88-gauge vinyl panels and double-stitched seams ensure these totes stand up to daily abuse as well as the impact of the night deposit drop.

### C. Fire-Block® Briefcase

**New!**

Made of 1000-denier Cordura®Plus fabric. Ideal for flat materials. Heavy-duty vinyl dome shields lock from heat. Comfortable plastic handles are securely riveted to bag, and reinforced with vinyl patches.

Model No.	Dimensions			Color
