

Maximum Security Features

Minimize fraud and loss during cash transfers

Release liner
exposes adhesive and also serves as a receipt for your records.

Bar code
matches sequential alphanumeric numbering and has a high readability rate for accurate scanning.

Unique alphanumeric numbering
stamped on bag and release liner creates tracking capabilities. This feature prevents thieves from stealing and replacing the bag.

Yellow shaded write-on area
accepts notations using a pen or marker.

Serrated edging enhances the physical aspects of the security technology, but does not compromise the strength of the closure.

Security closure incorporates a "honeycomb" void pattern which includes specially-designed "target" lines within the heat indicating dots. Exceeds all requirements for levels of tamper-evidence at temperatures ranging from -60°F to 160°F.

Strong pouch seams are indented from the edge of the bag by a minimum of 1/8". If cut and resealed, portions of the microprinting along the seams will be visibly missing.

Sturdy, co-extruded recyclable plastic construction ensures no ripping or puncturing occurs under normal use.

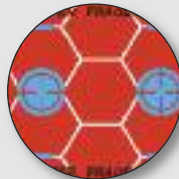

Bottom edge of bag is folded, not sealed. Any attempt to enter the bag through the bottom would require puncturing the bag, which would be instantly visible.

Tamper Indicators

HEAT INDICATORS

Blue dots appear on seal when tampered with heat from a hair dryer, vehicle heater, or other source.

SALIVA INDICATORS

Black "star" graphics under seal appear distorted when saliva-soluble ink comes into contact with saliva, solvents, or other chemicals.

COLD INDICATORS

'VOID' graphics on seal give instant evidence of attacks on the bag by freezing agents such as coolants or Freon. Serrated edges tear when tampered.

SEAM INDICATORS

Microprint along sides is missing or distorted if seams are cut and resealed.

Tamper-Evident Deposit Bags

A. FRAUDSTOPPER™ Tamper-Evident Deposit Bags

- Fast, accurate, and affordable way to prove your deposit reached its destination without tampering

Made of durable, clear co-extruded polyethylene film that is water and tear-resistant to withstand rough treatment and keep your deposit intact. Packed 100 per box.

Tamper-Evident Deposit Bags

A. **BIONATURAL™** by MMF INDUSTRIES **NEW!**

- Excellent deposit security with Eco-Friendly Green attributes!
- Biodegradable Tamper-Evident deposit bags contain a propriety additive that allows microorganisms in landfills to decompose plastic bags

Unlike photodegradable and oxo-degradable bags that require sunlight, heat, or moisture to initiate the process, Bio-Natural™ Bags have **an unlimited shelf life** and will only start to biodegrade when placed in a fully microbial environment.

Bags secure bank deposits, and are built to withstand the impact of the night depository drop. Durable co-extruded film is water and tear-resistant, keeping deposits intact and safe. Self-sealing adhesive closure is easy to use and has security features that include seam and void tamper indicating graphics. Bottom edge is folded while side seams feature wide seam technology for increased strength and security. Numeric numbering, bar code, and tear-off receipt create a permanent audit trail. Information can be written directly on bag in green shaded area. Packed 100 per pack; 5 packs per box.
